What are the Different Types of Fire Extinguishers UK ...

Carbon Dioxide Fire Extinguisher This is one of the best fire extinguisher for electrical fires as it leaves no residue i.e. the electrical items can probably be used again afterwards. The extinguisher contains pressurised CO2 gas, so when spraying the strong jet of CO2 on a fire, you are depriving the burning fuel of any oxygen.

Which Fire Extinguisher Should You Use? A Handy Guide

Water and Foam fire extinguishers extinguish the fire by taking away the heat element of the fire triangle. Foam agents also separate the oxygen element from the other elements. Water extinguishers are for Class A fires only - they should not be used on Class B or C fires. The discharge stream could spread the flammable liquid in a Class B fire or could create a shock hazard on a Class C fire. Carbon Dioxide
