This article surveys the literature on the detection of phishing attacks. Phishing attacks target vulnerabilities that exist in systems due to the human factor. Many cyber attacks are spread via mechanisms that exploit weaknesses found in end-users, which makes users the weakest element in the security chain. The phishing problem is broad and no single silver-bullet solution exists to mitigate ...

Phishing Detection: A Literature Survey | IEEE Journals ...
This view is perhaps related to the widespread perception that NLP system engineering work is somehow more prestigious than work on resources. Since *ACL conferences are top-tier, resource papers should almost by definition go to workshops and the lower-ranking LREC conference. This view is both unfair and counter-productive.
