Regardless of funding levels, health insurance access, barriers to care, stigma and psychosocial challenges, local hospitals, ERs and primary care facilities can help anyone with HIV/AIDS start HIV treatment (ART) and receive appropriate referrals for specialized care and services.

Improving Access and Removing Barriers to HIV Medical Care

To redress this imbalance, efforts to increase access to investigational drugs must be accompanied by broader measures to improve health care for the entire spectrum of AIDS patients. Ideally, such measures would be incorporated into efforts to improve access to care for all indigent populations in the United States.
