### **PCA**

According to Rogers personality is a process that can be split into seven stages. In stage One the organism is fixed, rigid, stuck, anxious and incongruent, through to stage Seven where the organism is fluid, spontaneous and congruent.

### **History of Rogers and his Person centred approach**

Carl Rogers (1902-1987) was a humanistic psychologist who agreed with the main assumptions of Abraham Maslow. However, Rogers (1959) added that for a person to "grow", they need an environment that provides them with genuineness (openness and self-disclosure), acceptance (being seen with unconditional positive regard), and empathy (being listened to and understood).

### **Carl Rogers | Simply Psychology**

The Seven Stages of Process Rory examines this theory by Carl Rogers, who believed that (so long as the core conditions are present) people move through different stages of process – from a place of rigidity to becoming a fully functioning person. The model is useful for supervision, providing a common language to discuss where clients are at.
