Travis Ci vs GitLab - GitLab | GitLab

GitLab CI is ranked 4th while Travis is ranked 5th. The most important reason people chose GitLab CI is: All of GitLab CI's code is open source and under the MIT license.

Travis vs GitLab Ci detailed comparison as of 2020 - Slant

GitLab and Travis CI are primarily classified as "Code Collaboration & Version Control" and "Continuous Integration" tools respectively. Some of the features offered by GitLab are: Manage git repositories with fine grained access controls that keep your code secure Perform code reviews and enhance collaboration with merge requests

GitLab vs Travis Ci | What are the differences?

When Travis CI has been activated for a given repository, GitHub will notify it whenever new commits are pushed to that repository or a pull request is submitted. Travis CI will then check out the relevant branch and run the commands specified in .travis.yml, which usually build the software and run any automated tests.

Travis Ci vs GitLab

CircleCI - Automate your development process quickly, safely, and at scale. GitLab CI - GitLab integrated CI to test, build and deploy your code. Travis CI - A hosted continuous integration service for open source and private projects

CircleCI vs GitLab Ci vs Travis Ci | What are the differences?

GitLab CI - GitLab integrated CI to test, build and deploy your code. Jenkins - An extendable open source continuous integration server. Travis CI - A hosted continuous integration service for open source and private projects

GitLab Ci vs Jenkins vs Travis Ci | What are the differences?

As far as I understand, the main difference is that gitlab-ci is opensource (you can install it on your own server) and travis-ci isn't. So then the latter is always cloud/service-based. And it's free for open source projects. But then GitLab.com (the company, not the software) also has a cloud version that you don't need to install: ci.gitlab.com. And I'm guessing this version can only be used with public repositories posted in your Gitlab account.

How do travis-ci and gitlab-ci compare? - Stack Overflow

Travis CI enables your team to test and ship your apps with confidence. Easily sync your projects with Travis CI and you'll be testing your code in minutes.

Travis Ci - Test and Deploy Your Code with Confidence
